The Middle Grades Partnership offers academically promising Baltimore Middle School youth the opportunity to excel in our city's most challenging high schools. Funded by a partnership among many members of Baltimore's funding community and composed of Baltimore area public and independent schools and universities, the MGP identifies potential scholars during their sixth grade year and provides them with comprehensive, year-round learning opportunities over three summers and their two remaining middle school years.

An MGP graduate will leave the program equipped to excel in an advanced high school program, to flourish in college and to enter the workforce prepared for Baltimore's most demanding and rewarding professions.

The partnership provides opportunities for public and private school and university teachers and administrators to work and learn together, with a common goal of identifying and delivering the best set of ingredients for student preparation – including curriculum, professional development and community education.

- After School Program

The ASP program builds upon the summer math curriculum. The math content during the ASP will further build the students algebra readiness skills. Students strengths and weakness will be determined based on summer post-test analysis, summer observations, informal observations during activities and games, and individual consultations.
